

Dear Faculty Member,

Thank you for your interest in becoming a member of the Molecular Biology Program. In order to submit a complete application you will need to follow the Faculty Application Guidelines (<http://www.bioscience.utah.edu/info/mbGuidelines/mbFacultyApplicants.html>). The guidelines outline the different letters and documents that are needed for your application. Make sure you read through and submit the correct items for your faculty appointment description. Please note as explained in the guidelines that a letter from the department chair(s) is required for various guarantees and, in some cases, a letter from the faculty of the participating department.

All applications should be made directly to the Program Director, Carl Thummel, and sent to Francine Stirling, fstirling@genetics.utah.edu (1400 EIHG). The departmental representatives of the Program Steering Committee will evaluate the applications. If there are any questions regarding these requirements or your current membership status, please do not hesitate to contact the Program office at 801-581-5207.

Sincerely,

A handwritten signature in black ink, appearing to read 'C. Thummel'.

Carl Thummel

Director, Molecular Biology Program
